Impact of Fossil Fuels on Human Health

Fossil fuels are cleaner and produce fewer emissions than the fuels they replaced.

Weather is less extreme in a warmer world.

Fossil fuels can be used safely for centuries.

Fossil fuels have lifted billions of people out of poverty.

Less Severe Weather

Sustainable Development

Less Poverty

Less Civil Conflict and War

Historically, conflicts increase during periods of cooling and decrease during warmer periods.

Less Air Pollution

Environmental Protection

Less Extreme Cold

Greater Food Supply

Human Safety and Welfare

Automobiles and electricity have vastly improved human safety.

Environmental Protection

Human Prosperity

Fossil fuels reduce the area needed to produce the energy we need.

Aerial fertilization by CO₂ has increased food supplies by 25%.
